# Pneumatic chamber pump PCP120.22P.411.122

Development and production of pneumatic conveying machinery and equipment: pneumatic chamber pumps, pneumatic screw pumps, filters, air collectors (receivers), assemblies and equipment of pneumatic conveying systems (flow dividers, elbows, flange transitions), air cleaning equipment and environmental protection.

Multi-phase pneumatic chamber pump. The main advantage of this air chamber pump is the wide range of settings and applications. Bulk material transportation can take place both in rarefied and intermittent mode, and in the mode as close as possible to the "dense phase".

Productivity is up to 200 t/h, the volume of the working chamber is 1200 dm<sup>3</sup>.

Weight 1167 kg.
